

## MODEL 6652 KRRONOS - Electronic Engine Control Head

The 6652 “KRRONOS” control head was developed to include the latest innovations - LCD touch screen technology is now introduced to the marine industry. With its sleek and compact design, superior materials in bronze and stainless steel and available in various surface finishes, the 6652 Control is complete with a 3.5” LCD touch screen with display and command control functions including: Station Select, Station Lock, Throttle Override, Engine Synchronization, Simulated Engine RPM and Direction indication, Alarm functions and Station-in-command indication.

### *Features:*

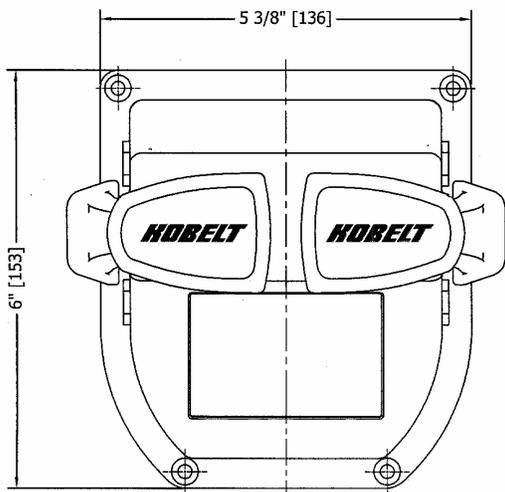

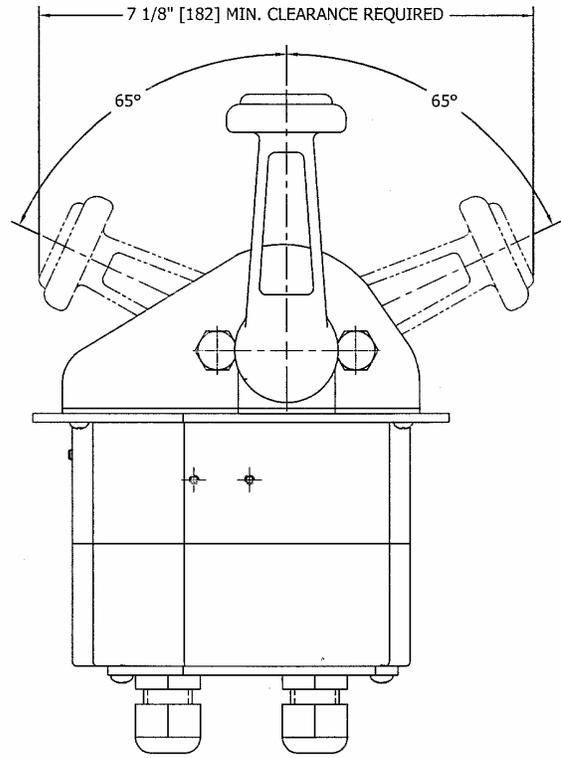

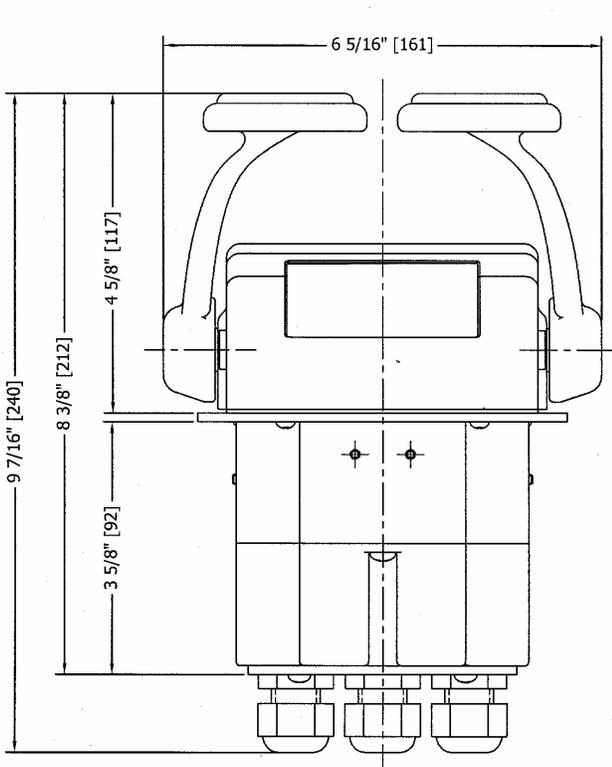

- Quick and easy installation with simplified set up
- Compatible with Kobelt’s advance “Mighty Mariner” system, works in conjunction with both electronic & mechanical-governed engines
- User-friendly LCD colour display allows you to interact with the system options
- Water-tight enclosure on exposed areas
- Special synchronization features – i.e. one lever synchronization mode will reduce fuel usage and decrease noise and vibration
- Full control from multiple stations – quickly & safely determines which station is in control with station-in-command indicator
- Control head constructed of corrosion resistant materials of bronze & stainless steel
- Backed by the best warranty in the industry

### **Ordering Information**

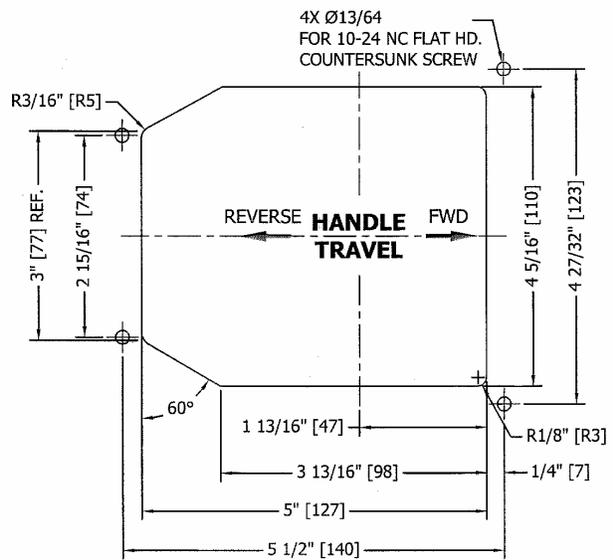

T = Twin engine application      B = Black finish  
C = Chrome finish  
G = Gold Plate  
L = Polished bronze finish  
W = White finish

To order, state model number followed by the desired designation letter codes.
